

A) Amendments to the Specification:

Kindly amend paragraph [0024] with the replacement paragraph as follows:

-- [0024] The insulating material base film 12 is dispensed from the unwinding roller 13 and wound up on the take-up roller ~~13~~15 after passing through plural guide rollers 17, a can roller 14, and an auxiliary roller 18 and plural guide rollers 19. The unwinding roller 13 and the take-up roller 15 correspond to the unwinding means and a take-up means of this invention. Although not shown, rotary drives are provided to drive the unwinding roller 13 and the take-up roller 15, respectively. --
